- **Owner:** Landmark Office, LLC
- **General Contractor:** The Beck Group
- **Architect:** Beck Architecture
- **Engineer:** Martin/Martin
- **Program (Building Type):** Healthcare
- **On-site Erection Date:** 2014
- **Panel Type:** StoPanel Classic ci

Project Overview

The three story Landmark Medical Office Building is located in Greenwood Village, Colorado. The exterior building envelope was built using StoPanel Classic ci pre-engineered exterior wall panels in lieu of the original hard coat stucco design.

Job Requirements

The original schedule duration was cut in half when the structural steel package was delayed, and the finish date could not be extended. StoPanel helped solve this problem by manufacturing wall panels offsite at the same time as structural steel was being installed on site. This allowed the original schedule to be met.

Smart Solution

Selecting StoPanel ensured that the original schedule was met and the quality exceeded expectations. Over 120 StoPanel Classic ci panels were manufactured and installed in just over five weeks. The Landmark Medical Office Building is a stunning example of the speed and quality that StoPanel delivers.
